

SIGMA TRAINING

We offer a number of predefined and bespoke training packages to help you get the most out of Sigma software. Whether you are new to the system and want to start with the basics, or a super user who wants to put into practice a new system feature, we have a course to suit you.

All our training courses are delivered by our expert Software Training team, and can be held in the comfort of your own office or at our onsite facility in Milton Keynes.

A typical training day runs from 9am to 3.30pm, allowing for a half-an-hour lunch.

The following is a list of our predefined courses, please speak to your Account Manager for more information about which sessions will provide the best training for your use of the system.

General
